## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6, 8, 9, 11-13 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Semple et al., hereinafter Semple (US Patent 6,218,701), newly cited.

Regarding claims 1, 2, 4-6, 8, 9, and 11-13, Semple discloses in figure 2A, a MOS device with a semiconductor substrate 101;

a gate electrode 205 formed over the semiconductor substrate and define a channel region within the semiconductor substrate; and

a pair of source/drain regions 104 formed within the semiconductor substrate and separated by the channel region within the semiconductor substrate, wherein least one of:  
an interface the channel region covered by the gate electrode; and  
an upper surface of the gate electrode is corrugated, as can be seen in the figure.

Regarding claims 15-20, the substrate is silicon (see column 2, line 66).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 7, 10, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Semple.

Semple substantially discloses the claimed invention, as discussed above, except for the longitude peak and the depth of the curved channel region. However, it would have been obvious to one of ordinary skill in the art at the time of the invention to adjust the height of the bumps on the gate electrode to make the transistor with suitable sizes for various applications. See *In re Woodruff*, 919 F.2d 1575, 1578, 16 USPQ2d 1934, 1936 (Fed. Cir. 1990) for the proposition that that when the specification contains no disclosure of either the critical nature of the claimed dimensions of any unexpected results arising therefrom, the Applicant must show that the chosen dimensions are critical.

#### *Response to Arguments*

5. Applicant's arguments with respect to the previously rejected claims have been considered but are moot in view of the new grounds of rejection.

#### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
